

Ocean Science
INTERNATIONAL, INC.

**Serving the Public through Educational Programs to Create
a Unique Awareness of Our Marine & Wildlife Environment**

CHART A COURSE FOR SUCCESS

For Centuries the ocean has fueled our sense of adventure, and taught us valuable lessons about survival and our connection to the environment. That premise, learning about ourselves and our environment, is what Ocean Science International, Inc. is all about.

Programs

Marine Education:

Marine Science Floating Lab program is a half day field trip conducted in the San Diego Bay on a boat outfitted with oceanographic equipment specifically for student use. All marine science activities incorporate major components of the state science framework and each trip is modified to suit the age group of the experiential expedition.

The curriculum includes:

- Hands on deployment and retrieval of collection equipment.
- Observations of the marine life collected.
- Use of oceanographic and scientific instruments and equipment for observation and analysis.
- Log and evaluate observations.
- Return sea life to the bay.
- Students write a summary of observations to be used on return to the classroom.

This program is coordinated through the San Diego County Office of Education, OSI supports some classes that need funding for these important marine science excursions.

Equipment and Marine Education Resources:

Ocean Science International, Inc. has available to schools, universities and community based organizations:

- Power and Sailboats
- Licensed Captains on OSI Program Vessels
- Marine Biology Tools for Sea Exploration
- Water Quality Monitoring Equipment
- Financial Support

Water Quality:

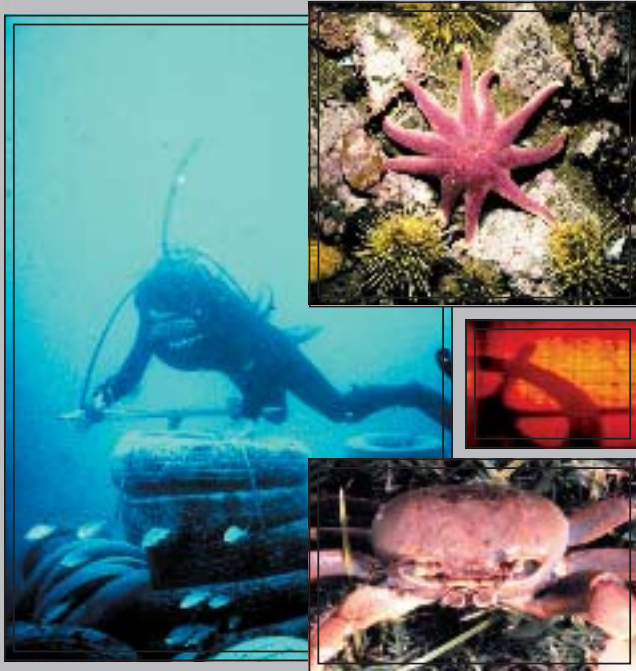

Ocean Science, Inc. is currently assisting in a water quality study of Mission Bay, in San Diego. Findings of this study are to be compiled, and compared to studies that have performed over the last 10 years. The purpose is to provide scientists, students and the public, with information about the current level of toxins in the bay. Although many strides have been made over the years to clean up local waters, there is still legitimate lingering concerns.

Global Initiative:

Everyone is thinking globally today. Which is why, Ocean Science International, Inc. also participates in G.L.O.B.E. (Global Learning and Observation to Benefit the Environment), managed by a Federal task force from N.A.S.A., the National Science Foundation, and other organizations. The G.L.O.B.E. Programs link Scientists with over 5,000 schools in 68 countries, all with one common goal:

To study the environment and protect it for future generations.

Under the guidance of teachers, G.L.O.B.E. students have collected millions of observations about our weather, atmosphere, soil and the ecology. Students benefit from hands-on learning and seeing their findings used in professional studies that have real scientific significance.

About OSI ...

OCEAN SCIENCE INTERNATIONAL (OSI) IS A NON-PROFIT PUBLIC BENEFIT ORGANIZATION PROVIDING VALUABLE MARINE, WILDLIFE AND ENVIRONMENTAL EDUCATION AND BOATING EXPERIENCES FOR AT-RISK AND DISADVANTAGED YOUTH, ELEMENTARY, HIGH SCHOOL AND COLLEGE STUDENTS. BY SPONSORING THESE PROGRAMS, OSI HELPS STRENGTHEN COMMUNITY INVOLVEMENT WITH OUR YOUTH TO PROMOTE GLOBAL AWARENESS OF THE ENVIRONMENT AND THE IMPORTANCE OF EDUCATION.

OCEAN SCIENCE INTERNATIONAL IS FUNDED THROUGH PUBLIC SUPPORT BY A VARIETY OF CHARITABLE DONATIONS THAT INCLUDE PRE-OWNED BOATS AND YACHTS, AIRCRAFT, AUTOS, REAL ESTATE, AND EVEN APPRECIATED STOCK AND ARTWORK. DONATIONS CAN BE HANDLED BY ANY OF OUR LOCAL FUND-RAISING OFFICES IN SAN DIEGO AND HUNTINGTON BEACH CALIFORNIA.

OUR GOAL: TO CREATE A UNIQUE AWARENESS OF OUR MARINE AND WILDLIFE ENVIRONMENT.

CHARITIES WILL BE A CORNERSTONE OF THE TWENTY-FIRST CENTURY. THEY HAVE PROVEN THEMSELVES TO BE THE MOST EFFECTIVE MEANS OF IMPROVING THE LIVES OF THOSE YET TO BE TOUCHED BY THE AMERICAN DREAM.
